

Instructions:

Create a Landing with Design of the PSD attached on the Dropbox Link. Once you confirm with the challenge you have 3-5 days to send a ZIP file or a git public URL to the repository.

Points to consider:

1. Landing Page must be responsive and pixel Perfect
2. Code Header and Landing Page Content, Footer not required to be coded.
3. First Video must be an iframe that render this [YouTube Video](#)
4. Create a Slider for the dining bar [SlideShow](#)
5. Premium Updated Liquors Video Button Should display a LightBox with an iframe containing this [Youtube Video](#)

Notes:

You can use any CSS Library to manage the Grid, such as Flexbox Grid or the Bootstrap Grid.

For Slider, Lightbox you can use any JS Library (Slick Slider, Owl Slider)

Consider As Plus:

Using Gulp or Webpack to manage CSS and Javascript Compilation

Use Sass for the CSS preprocessing.

Using ES6 Syntax and module Oriented with Babel transpilation on Task Runner.
